PROFESSIONAL SUMMARY

Backend engineer with 4+ years of experience building scalable server-side applications across fintech, microfinance, government, and real estate domains. Proven track record leading engineering teams, architecting multitenant systems, and securing critical infrastructure. Skilled in Node.js, TypeScript, Express, NestJS, Laravel, and modular/microservices architecture, with a focus on performance optimization and security hardening.

CORE COMPETENCIES

Node.js	TypeScript	NestJS / Express	PHP / Laravel
MongoDB / MySQL	RESTful API Design	Microservices	DevOps / CI/CD
React / Next.js	Security Hardening	Unit / Integration Testing	Modular Architecture

PROFESSIONAL EXPERIENCE

Source Microfinance Bank | Software Engineer

Apr 2026 – Present

Ikeja, Lagos State, Nigeria · Hybrid

- Designing and building software solutions to financial problems as part of the Source Microfinance Bank engineering team.
- Developing and maintaining backend services and APIs with NestJS to support core financial workflows.
- Building responsive, user-facing interfaces with React for customer and internal operations tools.
- Collaborating within a hybrid, cross-functional team to ship and iterate on product features.

Vista Microfinance Bank | Backend Engineer

Jul 2025 – Mar 2026

Lagos, Nigeria

- Developed a multitenant microfinance application using Node.js (Express) with modular architecture, enabling scalable client isolation and shared service layers.
- Designed backend infrastructure supporting core banking operations including account management, loan processing, and transaction handling.
- Built and integrated RESTful APIs connecting the mobile application with backend banking services.
- Implemented modular code structure to improve maintainability, facilitate feature scaling, and streamline onboarding of new tenants.

Taxtech

Nov 2022 – Jun 2025

Lagos, Nigeria

Lead Backend Engineer

2024 – Jun 2025

- Led a team of five engineers in developing tax automation software for government use, streamlining operations, improving compliance, and contributing to increased governmental revenue.
- Architected scalable microservices using Node.js and TypeScript, optimizing performance, reliability, and security across the fintech platform.
- Established coding standards, code reviews, and delivery workflows that improved team velocity and code quality.

-
- Owned technical planning and delivery of core modules, coordinating with stakeholders to meet compliance requirements.

Backend Engineer

Nov 2022 – 2024

- Discovered and resolved a critical security vulnerability in the company's fintech product, implementing hardening measures that strengthened access controls and reduced exposure.
- Recovered a mission-critical government user database essential for financial processing and reporting, directly contributing to a significant increase in revenue.
- Developed and maintained backend services and RESTful APIs using Node.js and TypeScript.
- Wrote unit and integration tests to improve reliability and reduce regressions across the platform.

Stephotec Computer Technologies Ltd. | *Backend Engineer*

Jun 2019 – 2022

Lagos State, Nigeria

- Built and deployed software applications, developing core engineering skills across the full software development lifecycle.
- Applied object-oriented programming (OOP) principles to design maintainable, reusable code.
- Used Git for version control and collaborated with team members on shared codebases.
- Contributed to debugging, testing, and iterative improvement of software features.

EDUCATION

B.Sc. Agricultural Economics | *Kwara State University*

2017 – 2022

- Researched and executed a final-year project, "Effect of E-Marketing on Agribusiness," building an e-commerce platform to market agricultural products — an early application of technology to agriculture.

CERTIFICATION

Advanced Node.js — Udemy, 2024
